M.C.P.R.: Monthly Constant Prepayment Rate, C.P.R.: Annual Constant Prepayment Rate

Hypothesis WAFF 0,11% and WALS 20%. Additionally, there exist other variables which are subject to continuous changes that affect the average life and the duration of the bonds (mainly: interest rate of the mortgage portfolio, prepayment, interest rate of the bonds of the three series, and the option of prepayment by the issuing bank). These variables and their hypothetical initial values are detailed in the Fund Floatation Information Leaflet. For the drafting of this document, actual and past values of the said variables have been used. However, it has been deemed appropriate to apply the Term Structure Interest Rates dated 30/09/06 so as to reflect more accurately variables that affect the dynamic parameters of the bonds.

1 Amortisation, at the discretion of the management company, provided the remaining balance of the principal of the mortgage loans is less than 10% of the initial amount and all the payment obligations arising from the bonds can be paid and cancelled in full.
