Rating Action: **Moody's Ratings upgrades ratings in three Spanish RMBS**

04 Sep 2024

Frankfurt am Main, September 04, 2024 -- Moody's Ratings (Moody's) has today upgraded the ratings of eight notes in FONDO DE TITULIZACION RMBS Prado VII (Prado VII), IM CAJAMAR 5, FTA (Cajamar 5) and RURAL HIPOTECARIO VIII, FTA (Rural VIII). The rating action reflects better than expected collateral performance for Prado VII and the increased levels of credit enhancement for all the affected notes.

We affirmed the ratings of the notes that had sufficient credit enhancement and an expected tranche loss commensurate with the current ratings.

Maximum achievable rating is Aa1 (sf) for structured finance transactions in Spain, driven by the corresponding local currency country ceiling of the country.

RATINGS RATIONALE

The rating action is prompted by an increase in credit enhancement for the affected tranches and, for Prado VII, decreased key collateral assumptions, namely the portfolio Expected Loss (EL) and MILAN Stressed Loss assumptions due to better than expected collateral performance.

Revision of Key Collateral Assumptions

As part of the rating action, we reassessed our lifetime loss expectation for the portfolio reflecting the collateral performance to date.

The performance of Prado VII has continued to improve since last year. Delinquencies have continued to be stable in the past year, with 90 days plus arrears currently standing at 0.25% of current pool balance. Cumulative defaults currently stand at 0.08% of original pool balance slightly up from 0.00% a year earlier.

We decreased the expected loss assumption to 3.43% as a percentage of current pool balance from 5.63% due to the improved performance. The revised expected loss assumption corresponds to 2.25% as a percentage of original pool balance.

For Cajamar 5 and Rural VIII, the performance has continued to be stable. Delinquencies have continued to be stable in the past year, with 90 days arrears

currently standing at 0.31% and 1.06% of current pool balance respectively. We have maintained the expected loss assumption as a percentage of current pool balance. The expected loss assumption as a percentage of original pool balance corresponds to 2.29% and 0.91%, respectively.

We have also assessed loan-by-loan information as a part of our detailed transaction review to determine the credit support consistent with target rating levels and the volatility of future losses. As a result, we have decreased the MILAN Stressed Loss assumption for Prado VII to 10.60%. We have maintained the MILAN Stressed Loss assumption for Cajamar 5 and Rural VIII at 6.10% and 7.20%, respectively.

Increase in Available Credit Enhancement

For Prado VII sequential amortization of the notes led to an increase of available credit enhancement for the Class A and B Notes. For instance, the credit enhancement for the Class A Notes has increased to 23.81% from 16.00% since closing.

For Prado VII, we note the risk of interest deferrals on Class B upon a cumulative default trigger being breached. After the step-up period in September 2025 all cash available after reserve fund replenishment will be used to redeem the Class A notes according to the priority of payments on the notes. If the cumulative default trigger for Class B is breached, no cash would be available to pay the interest on Class B. This event is only anticipated to occur in high default scenarios.

For Cajamar 5, a non-amortizing reserve fund led to the increase in the credit enhancement available in this transaction. For instance, the credit enhancement for the Class D Notes has increased to 5.59% from 4.93% since the last rating action. As of now, Classes A, B, C and D are amortizing pro-rata. When the pool factor falls below 10%, from the current level of 13.2%, the notes will amortize sequentially. This will accelerate the increase in credit enhancement for Classes A, B and C.

For Rural VIII sequential amortization and a non-amortizing reserve fund led to the increase in the credit enhancement available in this transaction. For instance, the credit enhancement for Class B has increased to 10.48% from 7.81% since the last rating action.

The principal methodology used in these ratings was "Residential Mortgage-Backed Securitizations" published in May 2024 and available at <https://ratings.moodys.com/rmc-documents/421986>. Alternatively, please see the Rating Methodologies page on <https://ratings.moodys.com> for a copy of this methodology.

The analysis undertaken by Moody's at the initial assignment of ratings for RMBS securities may focus on aspects that become less relevant or typically remain unchanged during the surveillance stage. Please see Residential Mortgage-Backed

Securizations methodology for further information on Moody's analysis at the initial rating assignment and the on-going surveillance in RMBS.

Factors that would lead to an upgrade or downgrade of the ratings:

Factors or circumstances that could lead to an upgrade of the ratings include (1) performance of the underlying collateral that is better than we expected, (2) an increase in available credit enhancement and (3) improvements in the credit quality of the transaction counterparties and (4) a decrease in sovereign risk.

Factors or circumstances that could lead to a downgrade of the ratings include (1) an increase in sovereign risk, (2) performance of the underlying collateral that is worse than we expected, (3) deterioration in the notes' available credit enhancement and (4) deterioration in the credit quality of the transaction counterparties.

REGULATORY DISCLOSURES

For further specification of Moody's key rating assumptions and sensitivity analysis, see the sections Methodology Assumptions and Sensitivity to Assumptions in the disclosure form. Moody's Rating Symbols and Definitions can be found on <https://ratings.moodys.com/rating-definitions>.

The analysis relies on an assessment of collateral characteristics to determine the collateral loss distribution, that is, the function that correlates to an assumption about the likelihood of occurrence to each level of possible losses in the collateral. As a second step, Moody's evaluates each possible collateral loss scenario using a model that replicates the relevant structural features to derive payments and therefore the ultimate potential losses for each rated instrument. The loss a rated instrument incurs in each collateral loss scenario, weighted by assumptions about the likelihood of events in that scenario occurring, results in the expected loss of the rated instrument.

For any affected securities or rated entities receiving direct credit support/credit substitution from another entity or entities subject to a credit rating action (the supporting entity), and whose ratings may change as a result of a credit rating action as to the supporting entity, the associated regulatory disclosures will relate to the supporting entity. Exceptions to this approach may be applicable in certain jurisdictions.

For ratings issued on a program, series, category/class of debt or security, certain regulatory disclosures applicable to each rating of a subsequently issued bond or note of the same series, category/class of debt, or security, or pursuant to a program for which the ratings are derived exclusively from existing ratings, in accordance with Moody's rating practices, can be found in the most recent Credit Rating Announcement related to the same class of Credit Rating.

For provisional ratings, the Credit Rating Announcement provides certain regulatory disclosures in relation to the provisional rating assigned, and in relation to a definitive

rating that may be assigned subsequent to the final issuance of the debt, in each case where the transaction structure and terms have not changed prior to the assignment of the definitive rating in a manner that would have affected the rating.

Moody's does not always publish a separate Credit Rating Announcement for each Credit Rating assigned in the Anticipated Ratings Process or Subsequent Ratings Process.

These ratings are solicited. Please refer to Moody's Policy for Designating and Assigning Unsolicited Credit Ratings available on its website <https://ratings.moodys.com>.

Regulatory disclosures contained in this press release apply to the credit rating and, if applicable, the related rating outlook or rating review.

The Global Scale Credit Rating(s) discussed in this Credit Rating Announcement was(were) issued by one of Moody's affiliates outside the UK and is(are) endorsed for use in the UK in accordance with the UK CRA Regulation.

Please see <https://ratings.moodys.com> for any updates on changes to the lead rating analyst and to the Moody's legal entity that has issued the rating.

Please see the issuer/deal page on <https://ratings.moodys.com> for additional regulatory disclosures for each credit rating.

Additional terms for Japan only: Moody's Japan K.K. ("MJKK") is a wholly-owned credit rating agency subsidiary of Moody's Group Japan G.K., which is wholly-owned

by Moody's Overseas Holdings Inc., a wholly-owned subsidiary of MCO. Moody's SF Japan K.K. ("MSFJ") is a wholly-owned credit rating agency subsidiary of MJKK. MSFJ is not a Nationally Recognized Statistical Rating Organization ("NRSRO"). Therefore, credit ratings assigned by MSFJ are Non-NRSRO Credit Ratings. Non-NRSRO Credit Ratings are assigned by an entity that is not a NRSRO and, consequently, the rated obligation will not qualify for certain types of treatment under U.S. laws. MJKK and MSFJ are credit rating agencies registered with the Japan Financial Services Agency and their registration numbers are FSA Commissioner (Ratings) No. 2 and 3 respectively.

MJKK or MSFJ (as applicable) hereby disclose that most issuers of debt securities (including corporate and municipal bonds, debentures, notes and commercial paper) and preferred stock rated by MJKK or MSFJ (as applicable) have, prior to assignment of any credit rating, agreed to pay to MJKK or MSFJ (as applicable) for credit ratings opinions and services rendered by it fees ranging from JPY100,000 to approximately JPY550,000,000.

MJKK and MSFJ also maintain policies and procedures to address Japanese regulatory requirements.
